Tokyo Disneyland Castle Projection
“Once Upon a Time”
to Premiere on May 29, 2014

URAYASU, CHIBA— **Tokyo Disney Resort®** announced that the Castle Projection show **“Once Upon a Time,”** a new nighttime entertainment at **Tokyo Disneyland® Park,** will premiere on May 29, 2014. This fantastic and heartwarming nighttime entertainment uses projection mapping technology to produce a three-dimensional effect by projecting images in a way that fits the contours of buildings and other structures. This is the first time for this technology to be used in an entertainment program at **Tokyo Disney Resort.**

“Once Upon a Time” begins with Mrs. Potts from the Disney classic film *Beauty and the Beast* telling her son, Chip, a bedtime story. Many of the unforgettable scenes from Disney films, including *Alice in Wonderland* and *Cinderella*, are vividly projected in 3D on the exterior of Cinderella Castle to the accompaniment of favorite Disney music and special effects, such as on-stage pyrotechnics. Guests will find that this brand new entertainment is rich and full of wonder, a veritable “storybook come to life.”

Show Facts

Duration: About 15 minutes
Venue: Cinderella Castle
Investment: About 2 billion yen (tentative)
